

QUATTRO-15

COMPLETE AR-15 RIFLE

Integral Optics Rail

Allows for easy mounting of sight options.

Enabler-Compatible Handguard

Accessories mounted via M-lok at the 3, 6, and 9 o'clock.

Match Duty Trigger

Rugged, single-stage, match-duty trigger.

Match Barrel

16" Match-Grade stainless steel barrel in .223 Wylde.

QMAG-53

53 round Quad Stack magazine, 80% increased capacity.

80% MORE CAPACITY: MAXIMUM RELIABILITY!

QMAG-53 Quad-Stack Magazine

The Quattro-15's 53 round magazines give patriots the ability to carry a 210 round load out with only 4 magazines instead of 7. Users will spend 50% less time reloading.

Match Duty Trigger

The single-stage match trigger provides a crisp, clean break with minimal overtravel. The trigger's nickel Teflon treatment further enhances smoothness and durability, giving you confidence in every shot.

Ergonomic Fit

The Quattro 15 rifle has a 13.7" slimline MLOK handguard, optimized pistol grip angle, and fully ambidextrous controls including; the Radian Raptor LT charging handle, the 45/90 degree Radian Talon safety, the magazine release, and bolt release. This ensures that tactical maneuvers, in high-stress environments, can be executed with confidence and speed.

Match Barrel

The rifle features a 16/11.5 inch mid-gas stainless steel barrel chambered in .223 Wylde, compatible with both .223 Remington and 5.56 NATO rounds. Its nitride finish enhances durability and corrosion resistance, while the mid-length gas system reduces recoil for faster follow-up shots.

Reliable Bolt Carrier

The full auto rated dual ejector Bolt Carrier Group, Chrome lined with a phosphate coating for protection, enhances reliability and maintains consistent ejection patterns. The rifle's Mil-Spec parts ensure flawless operation under any circumstance.

Compatible with Enablers

The rifle is fully compatible with enablers; suppressors, day and night optics, thermals, lasers, lights, and forward mounted grips. The 12 O'clock picatinny rail and handguard provide lots of real-estate for mounting accessories. The handguard attaches to the receiver using a two-piece wedge block mechanism, ensuring a rock-solid attachment with even pressure around the barrel nut.

NEW!

QUATTRO-15

UPPER RECEIVER ASSEMBLY

Introducing our Quattro-15 Upper Receivers,
available in
